

Merry Christmas and Happy New Year

And that's a wrap for the year! A big thankyou to all our colleagues who worked hard throughout the year to commission all kinds of projects from our product portfolio, small, medium, and large projects around the world. A big thank you to all our customers who challenge us to develop new innovations to further increase accuracy and quality. This helps make the manufacture of our prefabrication even more efficient. This in turn helps reduce timber wastage and keep up the global ongoing work to achieve sustainable building. We look forward to 2022 as there is much to be excited about. Globally the industry is adapting to the future and finding out that Randek is one of the main (together with our customers) sources of building market intelligence who are driving offsite construction forward. Advising customers on how to withstand competitive pressure by taking control of their building process, quality, speed as well as opt for a safer work environment. To meet the increasing demand Randek has taken onboard 16 new colleagues during 2021. We have launched a new product, LGS manual framing station and more.

Randek + SCM = Cooperation

RandekAB and **@SCM** join forces in a **new global cooperation**, where the aim is to be a one-stop supplier for the complete timber construction process offering the widest range of solutions for beams, walls, timber frame and X-lam/CLT panels machining. This strategic partnership is ready to make its mark on the future of timber construction, guaranteeing **top-quality, unique technologies and expertise** even for the most complex projects.

Services

Being the pioneer in the business offering leading systems such as ZeroLabor, AutoEye Truss System and AutoWall System it is vital to have the right services. We offer global support, maintenance, pre-study and financing as services. All with a clear purpose to help and support our customers. [Review service offer!](#)

Service and Maintenance Network

During 2021 we have signed several agreements regarding service and maintenance cooperation. In the Baltic region Randek authorized Global Machinery. In Poland Randek authorized Quattro Tech and in North America SCM. We welcome you all to the Randek network!

ZeroLabor Deliveries

We have now had ZeroLabor on the market since 2017 and the system serves as a perfect example of how we interact with our customers. Since the launch a significant part our development team has been concentrated its focus on the ZeroLabor System. After the first delivery we have added the following capabilities for the system: 2-5 robotic cell, gluing, tong and groove handling, sawing, single/double stud correction and the moving calibration table. We thank all our customers for a great cooperation. The added capabilities have been well received on the market as over 30 ZeroLabor systems have now been sold globally.

**We wish you
and your families
a Merry Christmas and
Happy New Year!**
