

BUILDING THE FUTURE

Webinar and update!

Light gauge steel automation, expansion, ZeroLabor upgrade and sustainability here comes a short update from Randek. Join us during our upcoming Webinar and we will tell you more!

Webinar

Welcome to participate in our online youtube webinar! We will host an online webinar the 16th of September at 09.00-10.30 Central European Summer Time, UTC+2)

Agenda:

Randek Steel Frame

System ZeroLabor 3.0

Auto Eye Roof truss system

Sign up for the webinar by sending an email to: webinar@randek.com

Randek UK

Randek UK is a joint venture with Swedish based Randek. The partnership started in 2019 to provide a sales and after care support service to the UK & Ireland timber frame and light gauge steel market. Driven by sustainability targets, labour shortages and the requirement for large scalable house manufacturing, the new arm of the company will offer complete wall, floor and roof cassette lines, truss lines and saw solutions.

“Randek intends to supply an improved and very expanded service to the UK market,” says Gordon Young, Director, Randek UK. “Our customers from the housebuilding sector, those who have invested in their own offsite manufacturing facilities or specialist suppliers of timber or light gauge steel components, will find Randek machinery very robust with installations still running perfectly well 20-30 years post-installation.”

Randek Steel Frame System

We are glad to introduce the Randek Steel Frame System! Our latest development enables a great majority of the Randek product range to be able to produce using steel frames, including the ZeroLabor system. Detailed information about the product range will be communicated during our webinar. [Read more!](#)

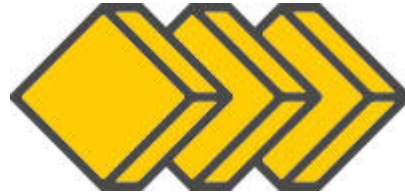

ZeroLabor 3.0

The latest development. Now it is possible to have 5 robots working over 2 working stations, adding capacity and flexibility.

BUILDING THE FUTURE TOGETHER with BoKlok

The trend is energy efficient houses built in wood. Traditional family and multi storey houses built faster than ever thanks to prefab modules, lifted and installed on the building site.

It is with great pride that Randek can share the Swedish building tradition combined with a high level of automation throughout the world. BoKlok is an excellent example of that. [Read more!](#)

Riverbend Building Supply Ltd

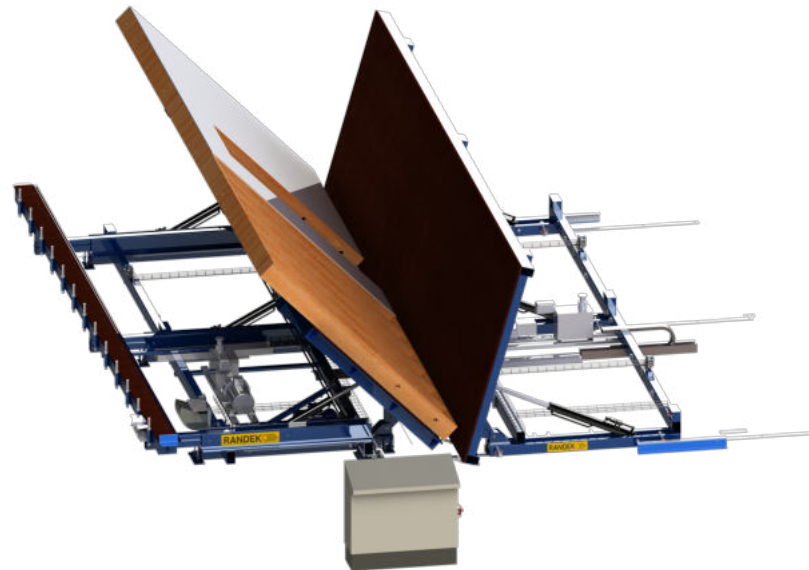

Riverbend Building Supply Ltd has as the first Canadian component supplier to the housing industry invested in a Zero Labor Robotic System System for wall production. The Robotic System is set-up as a compact solution. The system will handle sheets, nail/screw, cut out and handle waste. All processes performed in one cell. All automated processes are controlled directly from CAD-files. ZeroLabor Robotic System (Compact) helps Riverbend Building Supply to achieve higher productivity and quality level. Read more!

BS40 Butterfly Table

Randek butterfly working table table BS40 is an efficient tool when producing prefabricated walls, floors, roofs, and gable elements in timber frame or steel frame. The motorized clamping function combined with a robust design guarantees as reliable and efficient machine for many years. [Review our updated brochure!](#)

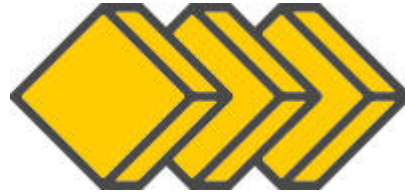

AutoEye Truss System

It takes time to change a market. The AutoEye delivers the highest productivity numbers on the market combined with high quality. Currently market leading truss producers in: Australia, Germany, Norway, Sweden, USA are using the AutoEye. Currently we are building 3 AutoEye Truss Systems in our factory. Are you interested in making your production more efficient? Contact us!

Solar Panel

Sustainability. Randek wants to contribute to a better environment and a sustainable world. Therefore, we have installed 3000 sqm solar panel on one of our factory roofs. Soon you are welcome to visit us for an inspection!
